Bio

Emmanuel Nwanguma is a machine learning engineer based in Lagos. Background: a BSc in Biochemistry and one year as Data and Records Assistant in the HIV/AIDS Unit of the Ministry of Health, Osogbo.

Relevant work

- Author of six open-source tools for testing and monitoring AI systems.
- Built an 833-test benchmark comparing six language models.
- Previously fine-tuned a small language model for finance tasks with LoRA.
- Ranked 13th of more than 200 contributors to the open-source aden-hive agent framework, with 14 merged pull requests.

Work on this entry

- Wrote the full pipeline: data preparation, QLoRA fine-tuning of N-ATLaS, benchmark and statistics.
- Ran the 500-question benchmark against base N-ATLaS and published every per-question result.
- Published the adapter at https://huggingface.co/Emar7/N-ATLaS-Health-QA-LoRA-Powered-by-Awarri and the code at https://github.com/Emart29/emart-health.
